CLASS RANK

5430 CLASS RANK

The academic environment at Collingswood High School is very challenging. The majority of pupils meet that challenge by earning exemplary grades. The comparisons among pupils inherent in rank-in-class calculation unnecessarily increase competition within the school. The Board of Education believes that this single-figure transcript statistic does not equitably or fully communicate the pupils' levels of achievement. Therefore, Collingswood High School does not report class rank as a routine practice.

Class rank will continue to be calculated for the express purpose of those students who are required to report it for admission to a college or academic program. Class rank will not be released to a college, university, or academic program unless a direct request comes from the college and both parent(s) or legal guardian(s) and student agree that the rank should be released.
