

OCDE Project GLAD® Path to Proficiency-A Year Long Virtual PD Path

The most comprehensive online coaching program to support teachers with OCDE Project GLAD® implementation and language development. The Path to Proficiency is the only implementation program of its kind that not only shows teachers exactly how to take the next steps with Project GLAD® and utilize the strategies like a pro - but how to strengthen language development of all students in the process.

It's like having a virtual full time coach on staff for every teacher - wherever they are and whenever it fits into their schedule! The Path to Proficiency provides exactly what your teachers need without adding anything else to YOUR plate.

Can anyone join?

The Path to Proficiency is officially designed for teachers who have been through OCDE Project GLAD® Training (Tier I/Foundations).

Whether teachers had Project GLAD® training this past winter or 10 years ago this course meets them where they're at and takes them through an intentional pathway to higher levels of impact.

However, with the realities of current PD constraints, we also recommend the Path to Proficiency as a great introduction for teachers who haven't had the opportunity for the official foundation training.
