It may be necessary for board members to serve on committees. Board representation may be stipulated through board policy, appointment by the school board president, or by administrator request.

The school board president shall appoint school board members to committees as necessary. The purpose of the committee should be determined by the board, or by the administrator who facilitates the committee work. In cases where board members are needed to serve on committees, there should not be more than three (3) board members on any committee. All committees are advisory to the board.

Unless otherwise stipulated by board policy or the board president, board members will not serve in an administrative capacity on these committees. Board members will work within the committee structure as per the direction of the committee and committee chair.
