

	ABERDEEN SCHOOL DISTRICT	NEPN Code: ECF
	POLICIES AND REGULATIONS	

ENERGY CONSERVATION

The School Board recognizes the need to participate in conserving the nation's energy resources and the economic reality of increased costs of utility services require that an energy conservation program be supported by all school district personnel.

The School Board accepts responsibility to maintain an aggressive program to reduce consumption of energy by the schools and to provide education on conservation of energy.

- The public schools are committed to cost effective energy practices within the district's buildings.
- It is recognized that to achieve maximum benefit from this commitment, all staff have a responsibility for effective energy practice.
- The curriculum for public schools include information which will help create an awareness of both the importance of energy conservation and the responsibility for conserving our energy resources.

In order to conserve all forms of energy, it is our intent to focus on the following:

- heating
- cooling
- night setbacks
- domestic hot water
- electrical
- lighting
