

We are here to help your child with Epilepsy or seizures have the safest and most successful year possible! There are a few steps for you to take to help in this process:

1. Complete the Questionnaire for Parent of a Student with Seizures (see link in Seizures folder). You can discuss this with your Healthcare Provider and then give to your child's school nurse.
2. Provide the school with a Seizure Action Plan that is completed by your Healthcare Provider and you. (see link in Seizures folder).
3. Meet with your school nurse and teachers to discuss the Action Plan and any concerns you may have.
4. Provide any needed medications or supplies.

The link below includes helpful information on Managing Epilepsy in School.
