

Dear West families, please see the following information with more information about our back-to-school plan.

- Teachers and administrators are creating a detailed plan to describe the format and expectations of remote learning for students who do not attend in-person. The remote learning plan will be provided on July 31 so that families are fully-informed before making their enrollment decision.
- Elementary students who participate at school for in-person instruction (8:15am-1:30pm) will fulfill their daily requirements of 5 clock hours of instruction and will not have any further remote learning after the end of their school day.
- Elementary buildings will be providing a device to every student. K/1 students will be issued an iPad; students in grades 2-5 will be issued a Chromebook. These devices will stay at school while we are normally in session, but will be sent home if our school transitions to remote learning.
