Homework

Homework consists of assignments made by teachers that students must complete during non-class time. Homework is intended to deepen knowledge and provide practice of certain concepts and/or skills found in the written and taught curriculum.

As per district guidelines, teachers must use their professional judgment in determining the length, difficulty, and student readiness to proceed with homework assignments.

When possible, teachers should be cognizant of community and school activities when assigning homework. Wednesday night, traditionally a family night, is one example of such an activity.
