

Carsonville-Port Sanilac Tiger Times

Carsonville - Port Sanilac Schools

December 8, 2017

Zack N. was Dr. Jekyll in the fall production of Dr. Jekyll and Mr. Hyde.

The Play

By: Abby W.

On Friday, 5th - 8th graders got to go watch the play. I thought the play was really good. The play had some scary parts in it. I thought the cast did very well and the props were pretty good too. It was about a guy who turned into a bad guy, and half the time he was good. There was one guy killed. The story was placed in a girls only school. Good job CPS Theatre 13!

Tiny island made of garbage

By Lizzy F.

George Henderson found an island completely made of garbage with living animals . With shelters made by them. There were hermit crab and insects . They have been working on how the garbage got there. They think that the wind carried it there but from where ? There are no plans to clean up the island . (Information from Nick Perry)

Jackie Robinson gets statue at Dodgers Stadium

By Lance T.

Jackie Robinson was the very first black man to play baseball in the major league. Before Robinson no other black players were allowed in the majors. He got the statue to celebrate april 15 because it is Jackie Robinson 70 anniversary. The statue was 77 inches tall. The statute also weighed 700 pounds. I got all of this information from Beth Harris.

CPS Tiger Pride!!!

White House Christmas

By: Kelsey L.

As Darlene Superville wrote in her article. Melania Trump and son Barron received the official White House Christmas Tree on November 20. It is a time-honored tradition. A military quartet played holiday tunes. A horse-drawn wagon carried the 19 ½ foot Balsam fur tree from Wisconsin up the White House driveway. "This is a beautiful tree. Thank you so much. We will decorate it very nicely". That's what the first lady told the chapmans the other family members. "I hope you can come visit with us."

Czech Zoo birth of endangered Black Rhino

Klarissa.S

Published by. Associated press

An eastern black rhino was born in a czech zoo. Experts say it is a small but important step in efforts to save the animals from extinction. Only a few hundred remain in Africa reserves there they are protected from poachers. Some 140 are in european zoos. The rhino was born on oct.2, 2017 in the Denver Kralove Zoo. Curator, Jon Zdarek, says the calf has been in good shape and will stay with her mother. Her mother's name is Etosha. She will stay with her for at least a couple of years. After she might join four others in the zoo of a native habitat in Africa.

Violet J. looks to pass the ball in Monday night's victory over the Peck Pirates.

Junior High Girls Basketball Games

By: Chloe D.

On Monday the girls team destroyed Peck with a half-time score of 6-2 and a finishing score of 34-17. They played 6 quarters, 3 with just 6th and 7th grade and the other 3 with mainly 8th grade, but also a few 6th and 7th graders too. On Wednesday the girls went to Caseville and played a great close game but still fell a few points short after having a lead. The girls gave it their all and tried their hardest. Congrats to the great lady tigers!

Earth's Changing

By: Sean B.

They are researching about the water and the climate. The website is called Tween Tribute and the caption said watch 20 years go by in 3 minutes. Looking at the ice caps as gray. The oceans appear as blue. Looking at two decades in 2 ½ minutes. The picture is the map of our home planet called earth.

Congratulations! Macy M., Dameon K., Isabella S-C., Clara M., and Tony R. won 1st place at the Middle School Quiz Bowl match in Peck on Tuesday.

Quiz Bowl
BY: Emily N.

It was another proud night for the 7th and 8th grade Quiz Bowl Team A as they took first for the second month in a row. The 7th and the 8th grade Quiz Bowl Team B placed 6th. The CPS 4th through 6th grade Team B placed 3rd and the CPS 4th through 6th grade Team A placed 10th. The CPS Team A was in the final match against Sandusky A. CPS A won 135 to 90. They were undefeated. This team was Tony R. and, Dameon K., Clara M., Isabella SC. and Macy M.

Sheep Can Recognize Baaaa- Rack Obama's Face, New Study Shows.
By: Emily S.

New studies show sheep have abilities to recognize human faces. Cambridge University study sheep can recognize faces of human handlers without training. Sheep can even recognize familiar faces of other sheep humans. Researchers say this study of sheeps recognize faces and may be useful in huntington's disease and other human brain disorders that affect processing. Sheep have advanced face- recognition abilities comparable to those of humans and monkeys. The research was published in Royal Society. This article was written by Associated Press.

Seal removed from an alaska airport
By Bill Beauchamp author of this story
associated press

A seal was longing in an airport. It weighed around 450b airport security had to use a sled to move it off the airport. Although it seems strange a seal at a airport it is common in Alaska.

Light pollution increasing around the world
By: Mason G.

The dark places on and around earth are getting brighter that's bad for all creatures including humans. Light pollution is threatening darkness almost everywhere. Researchers measurements coincide with a change in outdoor light. The switch is to energy efficient and cost saving light emitting diodes or LED's, I found my research from Tweentribune.com.

New York makes college tuition free
BY: Emily N.

There's a big string attached to New york's free middle-class college tuition initiative. Students must stay in the state after graduation or else pay back the benefit. Democratic government. Cuomo said "that the requirement was added to protect the state's investment in a student's education". The requirement ensures they don't take advantage of free tuition and then leave New york. The rule wasn't a part of Cuomo's free college tuition proposal when he unveiled it in January. It was inserted during final negotiations with lawmakers over the state budget. I found this information from Anna Groneworld and David Klepper.

Oakland Raiders plan to move to Las Vegas
By: Tristan P.

Next march 2018 the Oakland Raiders are trying to sign an agreement to change their name to the Las Vegas Raiders. They are going to try and make a new \$1.9 billion dollar stadium. Lots of people are agreeing to this name because it would be a great change. I got this from the associated press.

3D Printers Becoming a Reality
Originally by: Emily Matchar
Summarized by: Chloe D.

Lipson, a professor at Columbia University has been studying 3D printing 20 years. He and his students are getting closer to making 3D food printing a reality for the average person. They started printing metals, plastics, and robot, and now even food. When they started trying to print food they thought it would be a frivolous thing, but when people saw and heard of the idea they wanted it for themselves. Now they are taking it seriously. Throughout their process they have had various levels of success. The students even broke the machine once and they all had to fix it. They are figuring out ways to cook more food at once, because certain foods need more time to cook. Their first design was way too scientific with tubes and wires sticking out, until it was redesigned to look like an expensive coffee maker.

Reminders
By: Christian M.

- Congratulations to Alex Herrington and Jacob Deleon who were chosen to perform in the U of M Flint Honors band this past sunday. CPS is very proud of you!!!
-
- The seniors will have their composite pictures taken on Tuesday, December 12 at 9 am
-
- YAC members will have a meeting on monday december 18 at 8:30 am at Sanilac Career Center
