

The Wilmington Area School District has been informed that 2 members of the staff have most recently experienced symptoms identified with the COVID-19 virus. The staff members alerted Administration that they were experiencing symptoms, voluntarily submitted to testing, and will be immediately advising the District of the test results. In the meantime, the District has temporarily closed campus, postponed activities and referred members of the staff and their families to the current CDC guidelines.

The District will continue to require our students and staff to abide by the COVID-19-related policies for the health and safety of all students and staff, and expect these requirements to be implemented indefinitely. If PA Department of Health, PA Department of Education and/or CDC recommendations change, we will adapt our policies to comply with those guidelines. We will keep you apprised of any developments.
