CHS EAST Program Receives Superior Rating

EAST stands for Environment And Spatial Technology. East conference is the big annual event where East programs from across the state and country come to showcase the projects that they've been working on during the past year.

During the conference each school sets up a booth and selects a team to present its best projects. The program was presented by Mason Harper and Lane Oliver. Judges evaluate each schools programs by criteria such as what impact the East program is on the school, the district, and the community as a whole. The entries are also evaluated on the level of technology utilized to complete our projects. Finally, the presenters must do a good job of telling their school's story about what their East program is doing. The program received a Superior rating, which is the highest rating that is given.

Individually, Mason Harper received a Certificate of Excellence for several musical pieces that he composed and submitted for the conference's music competition. Mason's music was played several times during the Opening Ceremony and the Awards Banquet.

The Crossett High School East program received a superior rating at the 2013 East Conference. Accepting the award on behalf of the entire Crossett High School East Program was presenter Lane Oliver.

Crossett High School East student Allison Harrison poses for a picture with The Biggest Loser's Semi-finalist.

Mason Harper (4th from the right) received a Certificate of Excellence for music he submitted to the East Conference music competition.

A Night Of Greek Mythology At CHS

Mrs. Hall's 9th grade English classes participated in a Greek mythology research project that included a MLA formatted essay, display board, costume, and an authentic Greek dish. Students showcased their projects Monday, March 4th at 6 P.M. for parents and the community in the CHS cafeteria.
