

## Updated Reopening Survey Results

Thank you for taking the time to respond to our most recent survey. Our first priority is to provide the best possible education for our students in a manner that is safe for all the members of our community. Please know that we hear and appreciate your feedback and that our reopening plan also takes into account the recommendations and requirements from both the state and county public health.

1. Please select your first choice of the tiered reopening options still under consideration.

*We are still working within the three tiers previously communicated to you. Any measures we take initially are designed to get us to a full opening of school as quickly and safely as possible.*

### Results:

- 65% of respondents prefer a traditional opening.
- 15% of respondents prefer a “soft opening” with A/B cohort attendance.
- 20% of respondents prefer full distance learning.

2. If we are unable to have a traditional school opening with full time attendance for all students on our scheduled start date, which of these options would you like us to consider? Check ALL that apply.

*Please note, there are several considerations with changing our school start date, including no guarantee that a later start would allow for a normal opening and extending the school year further into the summer. In addition, in this question, respondents were able to select more than one choice.*

### Results (of most popular responses):

- 116 respondents indicated a desire to delay the start of school until after Labor Day.
- 93 respondents indicated a desire to begin the school year with a “soft opening.”
- 56 respondents indicated a desire to begin the year with full distance learning.
