Parent Notification

Date: _____

Dear Parent/Guardian,

A student, teacher, or other staff member in your child's class, group, and/or team has been diagnosed with COVID-19. All individuals in your home should monitor for symptoms and consult your child's physician as needed.

_____ Due to minimal amount of contact with the positive case, your child may continue to attend school, meetings, and/or practice. However, should your child become ill or have a fever, please keep him/her at home.

_____ Due to close contact with the positive case, your child should stay at home and self-quarantine for 10 full days from the last date of contact with the active case. If fever free, your child may return to school, meetings, and/or practice on _____. During this quarantine, should your child test positive for COVID- 19, we ask that you contact the school.

Please know that the school is taking all precautions in sanitation to prevent transmission. Although it is highly recommended that all students self-quarantine the full 10 days, MSDH guidance does give options to test out of quarantine and possibly return a couple of days early. For information regarding this option, please contact your child's school. If you have any questions, please feel free to contact your child's school. Due to privacy and FERPA consideration, we will not be able to disclose the name of the positive case.

Sincerely,

Principal: _____

School: _____
