DATE: March 20, 2020

### **Corporate citizens pitch in during Coronavirus pandemic**

Monday marks a new frontier for Mineola ISD as they begin educating our children in a completely virtual environment. There are students throughout the district who will need access to internet to which they may not currently have a way to connect.

The city of Mineola is proud of its corporate partners and is happy to report that Peoples Telecommunications is teaming with Mineola Civic Center, and MISD to help bridge this gap. These partners stepped up to provide a needed resource and a safe environment for our children.

At the Mineola Civic Center, the following areas will be available for WiFi use:

**Parking Lot** - students can work from their vehicles

**Peggy & Jack Jones Pavilion** - 12 picnic tables in open area

**Meredith Hall** - 5 separate rooms with limits of 10 people per room

All areas will be required to abide by the CDC guidelines for gatherings and "Social Distancing".
