

Guiding Principles (adapted from SCDE Task Force Guidelines)

Ware Shoals School District desires to:

- provide students with the best possible learning experiences by giving the greatest priority to ensuring the health, safety, and wellness of students and staff.
- avoid a scheduling scenario where the burden falls on teachers to simultaneously create and implement traditional and distance instruction for students in the same class at the same time.
- develop flexible plans to adjust scheduling models during the school year in the event of a decline or second wave of COVID.
