

Daily Home Screening for Students

Parents: Please complete this short check each morning and report your child's information [INSERT YOUR SCHOOL REPORTING INSTRUCTIONS] in the morning before your child leaves for school.

SECTION 1: Symptoms

If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and also put them at risk for spreading illness to others. Please check your child for these symptoms:

	Temperature 99.5 degrees Fahrenheit or higher when taken by mouth*
	Sore throat
	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
	Diarrhea, vomiting, or abdominal pain
	New onset of severe headache, especially with a fever

SECTION 2: Close Contact/Potential Exposure

	Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19
	Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases.
	Live in areas of high community transmission while the school remains open _____

* Fever typically constitutes 100.4 degrees or higher. However in light of recent events, a temperature of 99.5 degrees Fahrenheit with symptoms likely indicates an acute illness, and the individual must stay home. (This will apply to all Mahomet-Seymour Schools)
