

*****Asbestos Notice*****

This notification is to comply with the Asbestos Hazard Emergency Response Act of 1986, which requires the Imbler School District to notify patrons of the existence of asbestos containing materials in the Imbler Schools and the location of the district's Asbestos Management Plan.

All buildings in the Imbler School District were thoroughly inspected by a certified asbestos inspector, and any suspect material was tested by a certified asbestos testing laboratory. The most recent inspection was conducted in February of 2016. Asbestos containing materials were found to exist in the floor tiles in the secondary building and in the fume hood also located in the secondary building. The district Asbestos Management Plan is available for your examination in the district office located in the high school.
