Transportation Form

The following message and form link is for parents/guardians of students that CURRENTLY QUALIFY FOR DISTRICT TRANSPORTATION:

As we continue to plan for reopening, we are adhering to the guidance and requirements from both NYS Education Department and the NYS Department of Health. After receiving feedback from the Erie County Multi-District Stakeholder Survey for the Reopening of Schools, we looked closely at our local results.

The results from this survey for the City of Tonawanda stated that over 47% of respondents indicated that they would provide alternate transportation for their children to attend school for the 2020-2021 school year. This is an effort by parents/guardians to participate in reducing the student density on school buses each day by providing their own transportation for their child(ren).

The District is focused on providing the safest environment in mitigating the spread of virus on our school buses. We need to know which families who are scheduled for district transportation will not need the use of district provided transportation to start the 2020-2021 school year.

Your response will be used to plan for routing and bus configurations. It is important to answer every question for each child in your household.

We will use this information to create routing and the safest transportation for our students that are eligible to use of district transportation. We will allow for transportation eligible students/families to revisit this decision every 10 weeks. The first opportunity to revisit this decision will be at the end of October 2020.

Please click on the link below to complete this survey. This form will allow for parents/guardians to provide their own transportation to and from school to reduce the student density on the school bus for the first 10 weeks of the school year.

Survey responses must be submitted by Wednesday, August 19, 2020.
