Grade Book Analysis Tools

The Grade Book includes a variety of tools designed to help teachers view and analyze their students' data in different ways.

Options such as filtering and color-coding change the visual display of the Grade Book to highlight patterns in student performance and help teachers drill into specific problem areas.

Other options display score data in a new way, such as sparkline graphs and box and whisker diagrams. Some analysis tools differ based on whether you are viewing a Grading Task that uses traditional scoring logic or a standards-based approach scored with rubrics.

Finally, the Grade Totals section provides basic calculations based on student performance. These sections also differ based on whether you're scoring Tasks or Standards.

Keyboard Shortcuts

The following keyboard shortcuts are available when using the Grade Book:

Key Command	Result
Arrow Keys, Tab, Shift, Enter	Navigate among score cells in the direction of the arrow, Tab to move right, Enter to move down, Shift Tab to move left, Shift Enter to move up.
