

Alternative Education Programs

The Board of Directors recognizes that there are students with the potential to complete their secondary education who have difficulty completing the conventional school program. Some students require more support and direct supervision than is reasonably available in a conventional school setting; some students require a highly structured academic experience; and some students require a special focus on life skills and/or vocational education. The Board of Directors will provide alternative education programs.

Alternative educational programs will seek to provide appropriate academic, social and vocational experiences to assist students to re-enter the regular secondary program, move into another educational setting, or prepare them for successful employment.
