

## Chromebooks Wi-Fi outside of school

Before a Chromebook can be used outside of the school they need to join a wireless network 📶. If they see an **Network not available** page when logging in they will need to click on the **“Add other WiFi network”** select their **Wi-Fi network** from the list and enter their Wi-Fi Password.

They could also Click on the **Wi-Fi icon** 📶 at the bottom next to the time, Select **Not Connected**, select their **Wi-Fi network** and enter their **Password**.
