

I am Betty Iverson and I have been employed by BCHS for 33 years. A long time ago I graduated from Western Montana College with a minor in Biology and a major in Physical Education with an emphasis in Sports Medicine. I actually served as athletic trainer for BCHS in my younger years. I am a Title I (Skills Lab) teacher and spend my days helping my students with their homework, studying for tests, working on math, reading , English and organizational skills and hopefully helping them to prepare for life outside of high school. I also coach cross country and track.
