

## Trigonometry - Virtual Plan

I will be using the following platforms for virtual learning.

- 1) Google Classroom - All assignments will be posted here. This will be the first place to go each day. There may be an assignment to complete through google forms or google slides, or you may have an assignment in Edgenuity or IXL. Students will need to show work\*.
- 2) Edgenuity - online curriculum which contains videos, guided notes, assignments, quizzes, and tests.
- 3) IXL - online homework assignments given as extra practice for specific topics.
- 4) Google Meet or Zoom - will be used for instructional time, and answering questions.

Please be aware that since assignments are a combination of Google Classroom, Edgenuity, and IXL **the grade that matters is found on Wengage**. Grades will be calculated based on Tests (50%), Quizzes (10%), and Homework (40%). A **minimum** of 2 grades per week will be recorded.

\*Students will show work on paper in an organized fashion with their name and the assignment clearly labeled. Next, they will take a picture of the work, and then upload the work to the appropriate Google Classroom assignment. Please keep work in a binder. If it is blurry, then the student will need to upload a new picture of the work.
