

Virtual Plan

Whalen 2020-2021

We will be using the following platforms for virtual learning starting the first day of school and will continue periodically throughout the school year.

- Google Classroom – Instructions for each virtual class will be found here. This should be the first place each student goes each day. They may be instructed to go to do an assignment on google classroom, go to the Edgenuity website, or join a zoom meeting.
- Edgenuity – we will be using online curriculum which covers all aspects of biology through a virtual setting. If we are going virtual for a prolonged period of time, the students will be expected to test partially through the Edgenuity program along with another part of the exam on google classroom.
- Zoom – Throughout the school year we may have zoom meetings at least once a week to make sure everyone is on the right track, and to check understanding.
- Remind App – We will be using the remind app for any questions/problems a student may encounter. It is a quick way to communicate and resolve any problem in a quick manner.
