

Integrated Pest Management Update

In an effort to provide effective cleaning and disinfecting of school buildings and buses within RSU #57 during the Covid-19 pandemic, RSU #57 will be utilizing various means of disinfecting. One of these methods includes the use of electrostatic sprayers in accordance with the manufacturer's specifications. These sprayers will only be utilized by staff that have received proper training and direction in the use of these devices. The use of these devices will only be operated in areas at times when students are not present. Should you have questions about the use of these devices please contact Colin M. Walsh, Director of Finance & Operations and IPM Coordinator, at 207-247-3221.
