

MiFi HotSpot

CACS MiFi Network

MiFi Basics

The Conneaut Area City Schools is always working hard to provide the best education possible for our students wherever they may be!

Below are a few points to review about the MiFi device.

- Your MiFi Hotspot can be used only with a district issued Chromebook or associated district device.
- Personal equipment such as TV's, Cell Phones, and other related devices in your home will not be able to connect to this MiFi Hotspot.
- Please be sure to put the MiFi device in an area that has the best cell reception. You will see a signal indicator on the MiFi Hotspot. More bars the better.
- Be sure to have your Chromebook as close as possible to the MiFi device for best WiFi connection. The MiFi WiFi should have a usable range around 50' to 100' depending on surroundings.
- The MiFi device relies on Cell signals the same as your cell phone. If you have poor cell coverage in your area the MiFi may not work in every situation.
- If you are connected but are experiencing slow Internet speeds this can be caused by the cell strength. Please run a speed test at <https://www.speedtest.net/> and report the results to technology at the number below.

If you have any issues, please reach to your student's school that distributed your MiFi hot spot, or call our Technology Department at 440-593-7260.

Please take care of the equipment as if it were your own! We try very hard to provide all families with the tools students need in order to succeed, and to do that we need your help!

Please be sure to return all equipment in the same condition you received it.

Thank You!
