What is the ParaPro Assessment and how do I schedule it?

The ParaPro Assessment is a computer-generated test, created by ETS-Praxis to certify Paraprofessionals. The assessment consists of 90 multiple-choice questions across the subject areas of reading, mathematics, and writing.

As of September 1, 2022, the ParaPro Assessment is no longer offered at the Nye County School District-Human Resources location. This change was made by ETS nationwide, as a result of problems with their Internet-Based Testing (IBT) platform and to provide a better testing experience for ParaPro test takers.

The ParaPro Assessment will only be available at Prometric testing centers and via the “At Home” method of delivery after this date. To set up the “At Home” test, please visit <https://www.prometric.com/parapro>.

Please visit <https://www.ets.org/parapro/test-takers/about.html> to find the cost of the test, test preparation, testing locations, and other information. For testing options and scheduling, please visit <https://www.ets.org/parapro/test-takers/register.html>.
