

The Arkansas Education Service Cooperatives and
HHMI BioInteractive present ...

Viruses Across the Curriculum in an Online Setting

A FREE Workshop for Biology Educators

10/20/2020 - 3:30PM - 6:00PM

10/27/2020 - 3:30PM - 6:00PM

This workshop will be hosted on Zoom.

Viruses are always around us and always have been, and until recently, they have been easy to forget. Join us as we explore free, classroom-ready BioInteractive resources to help your students understand the biology behind the recent virus headlines. Using best practices in online instruction, we will model how viruses can be integrated throughout a biology curriculum (including cell biology, genetics, and evolution) to enhance student understanding of fundamental biological concepts. We encourage educators to attend both sessions for a complete workshop experience. There will be 30-45 minutes of asynchronous learning between the two sessions.
