

BATH TECH NEWS

Bath Regional Career and Technical Center

News from the office

Welcome to our first newsletter! Each week we hope to send out a newsletter focusing on the programs and happenings at Bath Tech.

While this year certainly feels different, our students and staff are making the most of each day. Students are attending "in person" classes two days per week with remote learning assignments on Brightspace for the three other days. We are fortunate to still be able to provide live work opportunities, and we will use this newsletter to keep you informed.

CALENDAR

October 5 - *First day of CNA Clinicals*

October 12 - *No School*

October 13 - *First day of Early Childhood Preschool*

ATTENTION LINCOLN ACADEMY STUDENTS:

Friday, October 9, will be a professional development day for Lincoln Academy. Students will have a distance learning assignment on this day.

Bath Tech Students Exploring the Possibilities

Meet the new Design and Fabrication Exploratory program for 9th and 10th graders. This course offers an introduction to graphic design, engineering & architecture, carpentry, and common math themes among the CTE programs. Students will be exposed to the basics of Autodesk 3D Design software, Adobe Photoshop, and design standards, in addition to a hands-on carpentry experience. Through design exploration and an introduction to the tools in carpentry, students will see their designs come to life!

Continue to follow us on our [Facebook](#) page, [website](#), and newsletter to watch the program throughout the semester!

College and Career Readiness

Bath Tech is a recipient of the MELMAC Foundation Career Readiness Grant. These funds are used to provide experiences to all of our students in hopes of exposing them to post graduate opportunities. With the challenges of COVID, this year many of the resources will be provided virtually. Each student is assigned to a Career and College Readiness course in Brightspace. Students will be periodically assigned tasks, such as: resume writing, goal setting, etc. Optional assignments will be posted throughout the year with resources and interactive opportunities. Keep a lookout for these optional assignments, as there will be incentives for students who engage in this content!

Seniors!

Please check your College and Career Readiness page for FAFSA information.

THIS IS CRUCIAL IF YOU WANT FINANCIAL AID!

Please see Ms. Clark if you have any questions.
