

04.33 Use of District Facilities

The use of school facilities shall be governed by the provisions established in this policy manual, the current fee schedule, and regulations established by the Board of Education. In all cases the activities of the school district shall have precedence over all other activities in the use of school buildings, grounds, and equipment.

Reservations for activities in individual schools and activities directly related to the individual school, i.e. parent organizations, student groups, etc. may be made directly with the school principal who will record the meetings and dates with the superintendent's office. Applications for the use of school facilities by others shall be filed and acted upon in order of filing. The superintendent of schools or other school officials authorized by the superintendent, is granted authority to refuse the use of school facilities to any lessee when it is determined that such use would not be in the best interest of the district or the public.
