

#### 04.31 Student Tuition

Non-resident students may be admitted to the regular school or special education upon the recommendation of the administration and payment of the tuition fixed by the Board of Education. In the regular classes tuition will be determined by the official school audit. In special education programs tuition will be computed in accordance with the cooperative and joint agreements.

No tuition students shall be accepted when, in the opinion of the administration with the approval of the Board of Education, it is believed to be contrary to the best interest of the residents of School District Number 10.

Tuition may be waived if the student is a ward of the court, if legal adoption by residents of the District is in process or if a foreign student is attending school in the District by invitation.

Tuition shall be paid in advance on a monthly, semester, or yearly plan. Other arrangements with other Districts participating in a joint agreement or special education cooperatives are acceptable. Tuition must be arranged by the administration of the attendance center or program and approved by the office of the superintendent.
