

Dear Parents and Guardians,

A warm welcome to 5th grade and to the 2021-2022 school year. You will be a very important part of the success of your student this year. I will be teaching your student Math. Some topics that we are going to cover include adding and subtracting fractions and decimals, multiplying and dividing fractions and decimals, the Order of Operations, conversions between measurement systems, and we will also be multiplying and dividing with multi-digit factors. Throughout the summer please continue to work on "Math Facts", such as Multiplication/Division tables.

As 4<sup>th</sup> Grade was the first year your student received letter grades, the 5<sup>th</sup> Grade will be no different. My grading system is the following: A 100-90, B 89-80, C 79-70, D 69-60, and F 59 and below. I do accept late-work and corrections for partial credit.

Work completion is a very important life skill. Students that have not completed their work in school will need to take it home, complete it, and return it the next day. We can maintain daily communication through the agenda notebook. Students are not required to get their Agenda signed by their parent/s. The assignments are always written on the board, and there is time given to put those assignments in the agenda.

In the classroom we have three basic rules: be responsible, respectful, and safe. These are the same rules that we have throughout the Elementary and Intermediate school.

Hopefully, you will have a wonderful summer! I am looking forward to a fun, exciting year. If you have any questions feel free to call me.

Sincerely yours,

Mr. Dwyer
