

## **MISSION STATEMENT**

We believe the best learning occurs when students, teachers, parents and community work together with mutual respect and high expectations towards mastering skills and obtaining knowledge necessary to deal with the ever changing and advancing technology in a safe and caring environment.

A free and appropriate public education is a privilege and a right of all children in MSAD 38. Our mission is to provide educational programs and instruction according to each child's aptitudes, abilities, interests and needs. Mastery of basic skills takes precedent over all other school initiatives and when necessary, energy and resources from other activities will be diverted to achieve what schools do best.

Education provides the foundation a child needs to become an independent and productive adult, able to make appropriate decisions, achieve objectives, realize ideals, and support community values. MSAD 38 will ardently pursue this mission to ensure that each student is provided the best education possible.

## **VISION STATEMENT**

Education is empowering all students to succeed in a changing world.
