# REOPENING

# THOUGHT EXCHANGE

K-2 STAFF: CERTIFICATED | OCTOBER 18

Do you feel learning and engagement levels are better in hybrid (part in-person, part remote) than full remote learning?

**95%**  
Combined Positive

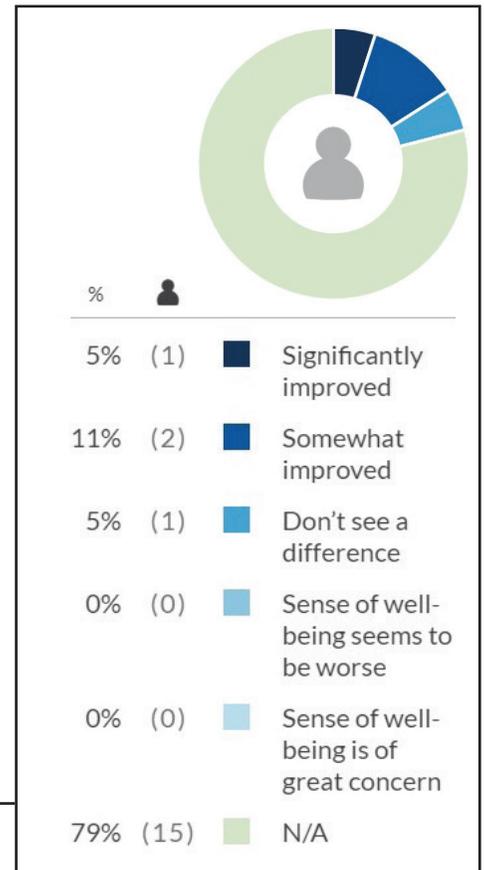

Do you think the health and safety protocols for in-person learning are clearly defined for you and your child?

Teachers are being asked to teach in two different modes and take on numerous new roles without having enough time to plan/prep for everything. This shows a disregard for teachers' well-being; there is no way to complete everything during the school day so I have to take things home nightly.

*Top Rated Mental Health Thought: Staff-Certificated*

What is your child's sense of well-being (socially, mentally and/or emotionally) since returning to school in-person two days a week?

# TOP K-2 THOUGHTS - CERTIFICATED

Kelso School District  
Staff – Certificated

**Q1** What are the most important challenges you are seeing or experiencing with HYBRID (part in-person, part remote) instruction and what is working well?

**Attendance is too difficult to track.** It is a waste of my time to check Edgenuity for attendance. I understand being flexible, but there has to be a better way.

4.4  (13 )  
Ranked #1 of 10

**Edgenuity is not a user friendly platform. It is hard for students, parents and teachers to navigate.** It is also not developmentally appropriate for 1st graders.

4.4  (12 )  
Ranked #2 of 10

**Hybrid classes are too big.** I am at 21 kids. It's very difficult keeping young students at a safe distance and avoiding cross contamination or the sharing of germs at 10 kids.

4.4  (11 )  
Ranked #3 of 10

**Edgenuity is not designed for hybrid** It is difficult to have them doing Edgenuity at school and home.

4.3  (13 )  
Ranked #4 of 10

**Class sizes are getting much larger now that students come to school. It was my understanding that each hybrid group would not go over 10 students.** I now have 11 in one group and I'm running out of room in the classroom for them to be socially distanced.

4.3  (12 )  
Ranked #5 of 10

**Attendance is too difficult to track as a teacher. Edgenuity is too difficult and time consuming for families with younger or multiple students.** The work in Edgenuity for younger students is not authentic or useful. It is not fair to parents to be expecting Edgenuity as work or attendance.

4.3  (11 )  
Ranked #6 of 10

**Edgenuity is not an easy platform to navigate.** Families are having difficulty even getting past the resources section. We should be on Module 5. Uploading work is not easy.

4.3  (11 )  
Ranked #7 of 10

**It's difficult to manage all aspects of teaching your in-person students while juggling all the expectations for at-home learners & parent comm.** We are not given enough time to plan & prepare for our in-person learners. It is a time consuming task to consider all the restrictions & safety.

4.3  (11 )  
Ranked #8 of 10

**It's difficult to juggle all of the parent communications regarding Edgenuity when you have students daily & only 25 minutes of prep for everything.** It's important for parents to get the support they need. It's unreasonable to expect teachers to provide this when they're teaching all day.

4.3  (10 )  
Ranked #9 of 10

**Keeping students engaged or connected to school on the days they are not attending school** Important to keep students learning on the days they are home, 2 days is better than all hybrid but going 5 days with nothing is just too long.

4.1  (11 )  
Ranked #10 of 10
