THOUGHT EXCHANGE

STUDENT | OCTOBER 18

Do you feel learning and engagement levels are better in full remote learning this fall than they were last spring?

75%
Combined Positive

I would rather be in school right now.

Top Rated Thought: Student

The important change I saw is my social life isn't really going well. It's important because it's effecting my mental health.

Q1 What are the most important challenges you are seeing or experiencing with FULL REMOTE instruction and what is working well?

I think the biggest challenge is processing and retaining information. Having classes only twice a week for 2 hours makes it very difficult to retain what I learn, and the computer screen hurts my eyes and makes me tired.

Ranked #2 of 10

Im having a hard time sometimes with understanding the teachers due to glitch. Sometimes the online resources that im supposed to use dont work. Plus doing stuff at home kind of makes me lack in motivation which i want but i just dont have the motivation to get any of it done which really sucks :/

Ranked #6 of 10

A challenge is that sometimes other things come up since we are at home and not at school. When other life things come up it's hard to get some work done. It's hard not being at school and having dedicated work time/ no distractions.

Ranked #7 of 10

I do get a little stressed sometimes about school work. Because I get a bad grade on odysseware, and some times its hard get in contact with the teachers so they can let me redo the assignment.

4.1  (9 
Ranked #8 of 10

Very confusing It's confusing because the teacher can't see what's wrong so you have to try and explain what's wrong so it's really confusing.
