

Wall ISD Local Wellness Policy

The Wall Independent School District is committed to providing a school environment that enhances learning and development of lifelong wellness practices.

To accomplish these goals:

- Child Nutrition Programs comply with federal, state, and local requirements. Child Nutrition Programs are accessible to all children.
- Sequential and interdisciplinary nutrition education is provided and promoted.
- Patterns of meaningful physical activity connect to students' lives outside of physical education
- All school-based activities are consistent with local wellness policy goals.
- All foods and beverages made available on campus during the school day (including vending, concessions, a la carte, student stores, and fundraising) follow Texas Public School Nutrition Policy.
- The school environment is safe, comfortable, pleasing, and allows ample time and space for eating meals.
- The school district will work within the existing school health council to develop, implement, monitor, review, and as necessary, revise school nutrition and physical activity policies.

Monitoring:

- The superintendent or designee will ensure compliance with the established district-wide nutrition and physical activity wellness policies.
- School food service staff, on each campus and at the district level, will ensure compliance with nutrition policies within school food service areas and will report findings to the appropriate administrator.
- In addition, the school district will report on the most recent USDA School Meals Initiative (SMI), review findings and any resulting changes. If the district has not received a SMI review from the state agency within the past five years, the district will request from the state agency that a SMI review be scheduled as soon as possible.
- The superintendent or designee will develop a summary report every three years on district-wide compliances with the district's established nutrition and physical activity wellness policy. That report will be provided to the school board, school health councils, parent/teacher organizations, school principals and school health teachers.
