

Campbellsport Parents and Students,

November 3

Hoping this communication finds you and your family healthy and coping with this challenging situation. The staff here in the Campbellsport School District have worked hard to adjust their instruction to eLearning for these last couple of weeks. With that being said **we will be returning** to each level's teaching model on **Monday November 9th**. Elementary students will be in five (5) days just like the Middle School. The High School will still be in the Cohort A here Monday-Tuesday and Cohort B present Thursday-Friday with the other days working on assignments remotely.

With the positive cases very high in the District and County, we must all remain and continue to be vigilant in personal hygiene practices including usage of masks and social distancing. Please monitor your student health daily and do not send them to school if they are sick. Influenza vaccinations are strongly recommended and should be sought out if you or your students have not received one yet.

PAA
