Business Manager

November 7, 2020

Parents and Staff,

Muleshoe ISD Administration has been notified by parents three Watson Junior High School students tested positive for COVID-19 on November 3, and five tested positive on November 6, 2020. It is our understanding some of these were rapid tests and other were PCR test. The students are isolated and the family has been quarantined. This is notification for the individuals that may have come into "close contact" with the student. The student has not been at school since October 9th. Muleshoe ISD is continuing to deeply sanitize all areas of the campus where the student member was present. All District employees and students are instructed to continue to follow guidelines and recommendations and to practice social distancing. Based on the information that we have gathered, it has been determined that the end of the students' 10-day isolation will be November 13<sup>th</sup> and November 16<sup>th</sup> respectively. Out of an abundance of caution, we advise you to monitor your health, follow the guidelines for people who have had close contact. Contact your primary care physician if you develop symptoms. Muleshoe ISD is continuing to monitor this situation and will provide additional information as needed. We hope for a successful recovery for our treasured students.

Respectfully,

"We're Building the Future, One Student at a Time"
