

## FOOD SERVICES MANAGEMENT

The Board considers the practice of serving food at school primarily a convenience for parents, children, and school management; secondarily as a means of encouraging good health habits.

The school system will operate a school lunch program, or contract the operation services out to an outside company. The school lunch program will be under the supervision of the cafeteria supervisor.

The cafeteria staff in each school will be directly responsible to the district cafeteria supervisor, but will cooperate with the principal of the school in matters essential to the proper functioning of the food services program. The responsibility for control of students using the cafeteria will rest with the building principal, who may assign appropriate staff to provide supervisory control.

Food services will include hot lunches, a breakfast program, and a milk program.

The Board will approve the prices set for school lunches and the price of milk. Students will also be permitted to bring their lunches from home.
