

TRAFFIC AND PARKING ON DISTRICT PROPERTY

This policy establishes the rules and regulations governing driving and parking motor vehicles and other modes of conveyance on district property. Speed bumps for school driveways and parking areas may be installed where deemed necessary.

In order to maximize the use of district parking lots for district purposes, parking lots shall be used by district personnel, students and visitors while on district property or conducting district business. Cars and other vehicles may park only in clearly marked, designated parking areas. Parking lots may not be used for storage, repair or any other improper purposes. Specific areas will be assigned for student parking. For the interest of safety, the principal may limit the number of student cars that may be parked on school grounds. All parking permits shall be issued on a fair and impartial basis with first priority being given to physically disabled persons. Individual school parking policies shall be made known annually to all faculty, staff, and students.

Parking fees may be established by the Superintendent. All parking fees collected at the school will be forwarded to the finance department to be budgeted and appropriated for school purposes.

The district reserves the right to suspend or terminate an individual's parking privileges for failure to comply with this policy or its regulations and procedures.

The Board shall not be liable or responsible for damage to cars and other vehicles parked on district property.

Failure to comply with this policy or its regulations and procedures can result in towing of the car or vehicle. The owner or user of the car or vehicle shall bear all costs and expenses related to the towing and storage of the car or vehicle.
