

Graduation Year Indicators

For each student enrolled in PowerSchool, there are two places to indicate graduation years. Following is the description of both fields and data that should be populated (On Time Graduation data is populated at enrollment based on enrollment grade. Projected Graduation is entered by the school counselor at the time of class scheduling) in them)

1. On Time Graduation Year-the field located on the demographic page for each student indicating the projected year of graduation based on the students entry in the ninth grade. As a general rule, the data in this field should not change except in the case of an end user data entry error. To search this field in PowerSchool, the field name to search is "ClassOf" (ClassOf=2016)

Gender	Male
Grade Level	10
Graduation Year	2018

2. Projected Graduation Year- the field set up on the Scheduling Setup page for each student indicating the projected year of graduation based on the students' progress and current grade. Normally, this projected year will not change from year to year if the student is on track to graduate on time. It is possible for this data to change if it becomes true the student will not graduate when previously expected. They may graduate early or later than previously determined. The year entered should be the school year (fiscal year) the student graduates. For example, if the student will graduate in May, 2016, the projected year should be 2016. If the student will complete graduation requirements in July, 2016, but for reporting purposes the graduation will be reported for 2015-2016 school year, the projected graduation year should be 2016 To search this field in PowerSchool, the field name and search is "Sched_yearofGraduation" (Sched_YearofGraduation=2016)

Required Settings	
Next Year Grade	11
Priority	0
Schedule This Student	<input checked="" type="checkbox"/>
Allow student to submit requests	<input type="checkbox"/>
Cohort Graduation Year (DO NOT CHANGE)	2018
Summer School Indicator	None
Note for Summer School Admin	<div>80 characters left</div>
Next School Indicator	Del City High School

These two fields combined will give an opportunity to identify both early and late graduates (5th year seniors). For example, to search for students scheduled to graduate early, the following command would be used: ClassOf=2017;Sched_yearofGrauation<2017. To search for students scheduled to graduate late, the following command would be used: Classsof=2017;Sched_yearofGraduation>2017
